

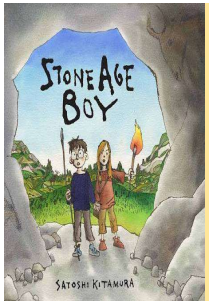
How could I survive pre-historic times?
Autumn Term 2 2026

Year 3

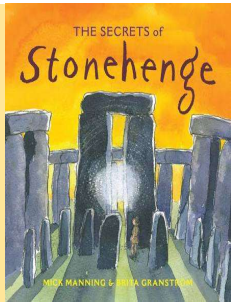
Park View Primary School



English:

Texts drivers: Stone Age Boy by Satoshi Kitamura and The Secrets of Stonehenge by Nick Manning & Brita Granstrom

Our first English learning journey will give us the chance to write stories in the style of 'Stone Age Boy' by Satoshi Kitamura. We will then move on to writing a leaflet with the aim of informing people about Stonehenge.

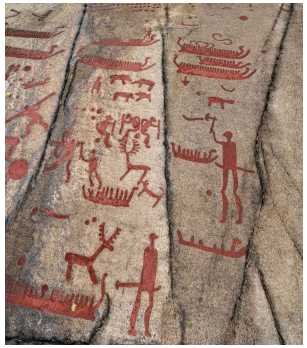


Maths: Division, Fractions, Units of Measurement

After recapping our place value knowledge, we will continue to learn about different ways to solve division problems. We will then move on to learning more about fractions, before investigating units of measurement.

History

During our history lessons, we will be learning about the period of history known as the 'Stone Age'. We will be exploring the 3 different eras that make up this age, as well as learning about what life would have been like for people alive in this time.



Science

In our science lessons, we will be learning about light. During this we will be investigating how shadows are formed and how they change.

DT

We will be building on our sewing skills in order to make a festive Christmas stocking!

RE

Our topic this half term is focused on angels and their importance to the Christmas story.

PE

This half term we will be developing our netball and dodgeball skills.

Wider learning at home

We encourage the children to read 4 times a week at home, as well as practising their spellings and times tables.

You could also:

Go on an interactive virtual visit to Stonehenge: https://www.english-heritage.org.uk/visit/places/stonehenge/history-and-stories/stonehenge360/

After your 'visit', you could make a model of Stonehenge out of clay or plasticine.

Write an acrostic poem using the words 'Stone Age'.

Bury some Stone Age 'artefacts' in sand and have fun digging them up and being archaeologists!

All of the Year 3 team appreciate the hard work you put in with your child. It really makes a difference ☺
